AS.200.101
INTRODUCTION TO PSYCHOLOGY

EXAM REVIEW DAY

1

YOU GOT THIS! IT WILL GO GREAT!

2

Frequently Asked Questions

3

What will the exam primarily focus on? Should I focus only on the slides? What about the readings?

Any assigned class materials is fair game for the exam. That being said, review the slides and your notes, and make sure you are familiar with main findings and topics of the supplemental readings.

4

Do I need to memorize all the names of scientists? Of every part of the brain or every neuron?

The level of depth of topics covered in the lectures is the depth you should expect for the exams. Focus more on understanding content as opposed to memorizing names.

5

Do I need to memorize all the details of all the studies?

Try your best to understand the main findings and implications of all studies discussed in class.

6

What type of questions should we expect on the exam? Are there any practice questions?

As Prof. Firestone mentioned, the exam will consist of 50 multiple choice questions. These will include Scenarios, True/False, and Fill in the Blanks. There will also be questions where multiple answers may be correct. To demonstrate this, we've prepared some practice questions.....

7

Some Practice Questions

8

Languages have a property that allows us to form and understand new sentences, even if we've never heard them before. This is called:

A) Infinity   B) Rules   C) Creativity

D) Syntax   E) Displacement

9

Languages have a property that allows us to form and understand new sentences, even if we've never heard them before. This is called:

A) Infinity   B) Rules   C) Creativity

D) Syntax   E) Displacement

10

True or False: Null Hypothesis Testing sees how unlikely it would be for you to find the data you found if there were an effect of interest.

A) True
B) False

11

True or False: Null Hypothesis Testing sees how unlikely it would be for you to find the data you found if there were an effect of interest.

A) True
B) False

12

_____ is another word for moving unacceptable feelings into unconsciousness.

A) Repression
B) Regression
C) Reflection
D) Projection

13

_____ is another word for moving unacceptable feelings into unconsciousness.

A) Repression
B) Regression
C) Reflection
D) Projection

14

For the first ten minutes of the movie, the kid talking behind you really bothered you, but as the movie went on, it didn't bother you as much. This is an example of:

A) Classical Conditioning
B) Operant Conditioning
C) Habituation
D) Behaviorism

15

For the first ten minutes of the movie, the kid talking behind you really bothered you, but as the movie went on, it didn't bother you as much. This is an example of:

A) Classical Conditioning
B) Operant Conditioning
C) Habituation
D) Behaviorism

16

_____ is another word
for attributing your own
unacceptable impulses to others.

A) Repression
B) Regression
C) Reflection
D) Projection

17

_____ is another word
for attributing your own
unacceptable impulses to others.

A) Repression
B) Regression
C) Reflection
D) Projection

18

People "stuck" in the _____ stage could be described as having a need for domination.

A) Oral   B) Anal   C) Phallic

D) Latency   E) Genital

19

People "stuck" in the _____ stage could be described as having a need for domination.

A) Oral   B) Anal   C) Phallic

D) Latency   E) Genital

20

True or False: Yelling at
your TAs when they try to help
you study is an example
of negative reinforcement.

A) True
B) False

21

True or False: Yelling at
your TAs when they try to help
you study is an example
of negative reinforcement.

A) True
B) False
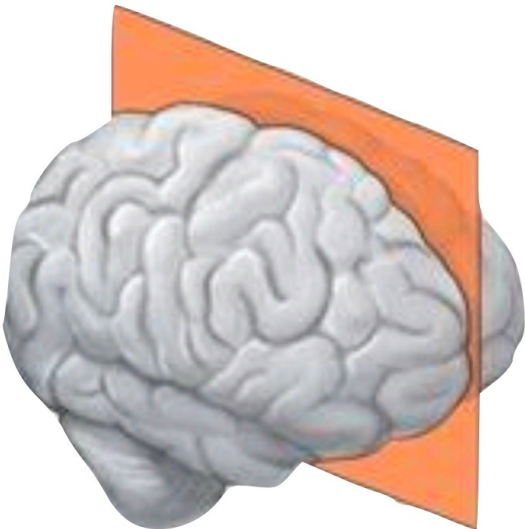

22

Which of the following is
a common criticism of Freud?

A) His theories lack evidence
B) His theories are unfalsifiable
C) He favors simplified explanations
for complicated phenomena
D) A & B
E) All of the above

23

Which of the following is
a common criticism of Freud?

A) His theories lack evidence
B) His theories are unfalsifiable
C) He favors simplified explanations
for complicated phenomena
D) A & B
E) All of the above

24

# What kind of cut is this?

A) coronal
B) horizontal
C) vertical
D) sagittal

25

What kind of cut is this?

A) coronal
B) horizontal
C) vertical
D) sagittal

26

Facts, ideas, and concepts are examples of _____ memory and skills, tasks, and habits are examples of _____ memory.

A) semantic; episodic
B) semantic; procedural
C) procedural; episodic
D) procedural; semantic

27

Facts, ideas, and concepts are examples of _____ memory and skills, tasks, and habits are examples of _____ memory.

A) semantic; episodic
B) semantic; procedural
C) procedural; episodic
D) procedural; semantic

28

True or False: Being grateful
for your TAs when they try
to help you study is an example
of positive reinforcement.

A) True
B) False

29

True or False: Being grateful
for your TAs when they try
to help you study is an example
of positive reinforcement.

A) True
B) False

30

Phonemes are roughly equated to _____,
Morphemes are roughly equated to _____,
and Syntax is roughly equated to _____.

A) sounds; words; grammar
B) words; sounds; grammar
C) letters; words; sentences
D) phonology; morphology; semantics

31

Phonemes are roughly equated to _____,
Morphemes are roughly equated to _____,
and Syntax is roughly equated to _____.

A) sounds; words; grammar
B) words; sounds; grammar
C) letters; words; sentences
D) phonology; morphology; semantics

32

Nicole hit her head yesterday and can now has trouble remembering things before yesterday. Nicole has:

A) To be more careful
B) Retrograde amnesia
C) Anterograde amnesia
D) Evergrade amnesia

33

Nicole hit her head yesterday and can now has trouble remembering things before yesterday. Nicole has:

A) To be more careful
B) Retrograde amnesia
C) Anterograde amnesia
D) Evergrade amnesia

34

What kind of cut is this?

A) coronal
B) horizontal
C) vertical
D) sagittal

35

What kind of cut is this?

A) coronal
B) horizontal
C) vertical
D) sagittal

36

From lowest to highest capacity,
which memories are in the correct order?

A) Sensory, Short-Term, Long-Term
B) Sensory, Long-Term, Short-Term
C) Short-Term, Long-Term, Sensory
D) Short-Term, Sensory, Long-Term

37

From lowest to highest capacity,
which memories are in the correct order?

A) Sensory, Short-Term, Long-Term
B) Sensory, Long-Term, Short-Term
C) Short-Term, Long-Term, Sensory
D) Short-Term, Sensory, Long-Term

38

Lauren also hit her head yesterday,
but she is unable to form
new memories. Lauren has:

A) To be more careful
B) Retrograde amnesia
C) Anterograde amnesia
D) Evergrade amnesia

39

Lauren also hit her head yesterday,
but she is unable to form
new memories. Lauren has:

A) To be more careful
B) Retrograde amnesia
C) Anterograde amnesia
D) Evergrade amnesia

40

True or False: 100 participants is the perfect number of participants for any study.

A) True
B) False

41

True or False: 100 participants is the perfect number of participants for any study.

A) True
B) False

42

Dualism is the belief that, while bodies are _____, minds are _____.

A) material; immaterial
B) immaterial; material
C) material; material
D) immaterial; immaterial

43

Dualism is the belief that, while bodies are _____, minds are _____.

A) material; immaterial
B) immaterial; material
C) material; material
D) immaterial; immaterial

44

The Stroop Effect demonstrates the _____ of language.

A) innateness
B) automaticity
C) abstractness
D) creativity

45

The Stroop Effect demonstrates the _____ of language.

A) innateness
B) automaticity
C) abstractness
D) creativity

46

People "stuck" in the _____ stage could be described as needy or as having an addictive personality.

A) Oral   B) Anal   C) Phallic

D) Latency   E) Genital

47

People "stuck" in the _____ stage could be described as needy or as having an addictive personality.

A) Oral   B) Anal   C) Phallic

D) Latency   E) Genital

48

True or False: Both pidgins and creoles are considered full-blown languages.

A) True
B) False

49

True or False: Both pidgins and creoles are considered full-blown languages.

A) True
B) False
